

# Custom Configuration Demo

Demonstrating All Options

---

Theme Developer

2026-01-07

Metropolyst Project

Extra text appears here with custom size/weight

# Layout Configuration

---

This presentation demonstrates custom layout settings:

| Option          | This Presentation  | Default |
|-----------------|--------------------|---------|
| aspect-ratio    | "16-9"             | "16-9"  |
| align           | horizon            | horizon |
| footer-progress | true               | false   |
| footer          | [Metropolyst Demo] | none    |

The footer on the left shows custom content instead of being empty.

# Font Configuration

---

Notice the header above is **larger and bolder** than default:

| Option        | This Presentation | Default   |
|---------------|-------------------|-----------|
| header-size   | 1.4em             | 1.2em     |
| header-weight | "bold"            | "medium"  |
| footer-size   | 0.9em             | 0.8em     |
| footer-weight | "medium"          | "regular" |

Look at the footer below to see the difference!

The title slide uses custom typography:

| Option          | This Presentation | Default   |
|-----------------|-------------------|-----------|
| title-size      | 1.8em             | 1.3em     |
| title-weight    | "bold"            | "medium"  |
| subtitle-size   | 1.1em             | 0.9em     |
| subtitle-weight | "medium"          | "regular" |
| author-size     | 0.9em             | 0.8em     |
| logo-size       | 2.5em             | 2em       |

Section dividers (like the one before this slide) use:

| Option         | This Presentation | Default   |
|----------------|-------------------|-----------|
| section-size   | 1.8em             | 1.5em     |
| section-weight | "bold"            | "regular" |
| focus-size     | 2.0em             | 1.5em     |
| focus-weight   | "bold"            | "regular" |

The next slide is a focus slide demonstrating these settings.

**Focus slides use custom size (2.0em)  
and weight (bold)**

# Color Configuration

---

Metropolyst has two types of configurable colors:

**Accent colors** — inherit from `accent-color` when auto:

- `hyperlink-color`, `line-separator-color`, `progress-bar-color`

**Background colors** — have independent defaults:

- `header-background-color` (dark teal #23373b)
- `focus-background-color` (inherits from header background)

This presentation uses **violet** (#7c3aed) as the base accent.

# Color Options Demonstrated

Each accent element has a custom color:

| Option                  | Default                                                                                  | This Presentation                                                                          | Where Used        |
|-------------------------|------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|-------------------|
| accent-color            |  Orange |  Violet | Base color, alert |
| hyperlink-color         | auto                                                                                     |  Indigo | Links             |
| progress-bar-color      | auto                                                                                     |  Violet | Progress bar      |
| line-separator-color    | auto                                                                                     |  Violet | Title line        |
| header-background-color |  Dark   |  Indigo | Header bg         |
| focus-background-color  | auto                                                                                     |  Indigo | Focus bg          |
| main-background-color   | Light                                                                                    |  White  | Slide bg          |
| main-text-color         |  Dark   | default                                                                                    | Body text         |
| header-text-color       | auto                                                                                     | auto                                                                                       | Header text       |
| focus-text-color        | auto                                                                                     | auto                                                                                       | Focus text        |
| footer-text-color       | auto                                                                                     | auto                                                                                       | Footer text       |

**Hyperlinks** use indigo: [Visit Typst](#)

**Bold text** is dark like normal text. **Alert text** uses the accent color.

**Progress bar** at the bottom uses violet with light indigo background.

The title slide's horizontal line uses violet (line-separator-color).

The **header** and **focus slides** use deep indigo backgrounds.

# All Font Options Reference

---

Like accent-color, the font parameter cascades to all elements:

| Parameter    | Default        | Description                           |
|--------------|----------------|---------------------------------------|
| font         | ("Fira Sans",) | Base font (this uses Lato)            |
| header-font  | auto           | Header font (defaults to font)        |
| footer-font  | auto           | Footer font (defaults to font)        |
| title-font   | auto           | Title slide font (defaults to font)   |
| section-font | auto           | Section slide font (defaults to font) |
| focus-font   | auto           | Focus slide font (defaults to font)   |

Set font once to change all fonts, or override individual elements.

# Complete Font Options List

| Parameter       | Default   | Description          |
|-----------------|-----------|----------------------|
| header-size     | 1.2em     | Header font size     |
| header-weight   | "regular" | Header font weight   |
| footer-size     | 0.6em     | Footer font size     |
| footer-weight   | "regular" | Footer font weight   |
| title-size      | 1.4em     | Title font size      |
| title-weight    | "regular" | Title font weight    |
| subtitle-size   | 1.0em     | Subtitle font size   |
| subtitle-weight | "light"   | Subtitle font weight |
| author-size     | 0.8em     | Author font size     |
| author-weight   | "light"   | Author font weight   |

# Complete Font Options (continued)

| Parameter          | Default   | Description              |
|--------------------|-----------|--------------------------|
| date-size          | 0.8em     | Date font size           |
| date-weight        | "light"   | Date font weight         |
| institution-size   | 0.8em     | Institution font size    |
| institution-weight | "light"   | Institution font weight  |
| extra-size         | 0.8em     | Extra text font size     |
| extra-weight       | "light"   | Extra text font weight   |
| logo-size          | 2em       | Logo size on title slide |
| section-size       | 1.4em     | Section font size        |
| section-weight     | "regular" | Section font weight      |
| focus-size         | 1.4em     | Focus font size          |
| focus-weight       | "regular" | Focus font weight        |

# Summary

---

## **Font options** (22 total):

- 1 cascading base font
- 5 element-specific font overrides
- 16 size/weight options

## **Color options** (12 total):

- 1 base accent color
- 11 specific color overrides

## **Layout options** (7 total):

- Aspect ratio, alignment, progress bar
- Header and footer content

See `README.md` for complete documentation
